

## Audience

1. Performance area should not be less than 15' wide and 10' deep.
2. Artists prefer two separate monitor mixes. When not possible, a single mix is acceptable.
3. A power strip (or duplex outlet) is required at the front, and back of the stage. Both can be fed by a single 15 amp circuit.
4. A qualified sound technician must be provided and must be prepared for a sound check not less than 45 minutes prior to the doors opening.
5. Band uses backing tracks that include drums, organs and low bass synthesizers. Sound system must be able to provide audio typical of a full rock band.
